

Cable Ladder

Strong and Durable

Unistruts Cable ladder systems are renowned around the world for quality and engineering excellence. Wherever severe corrosion conditions are present, or a long maintenance free life is required, Unistruts welded steel cable ladder systems is the obvious choice.

Advantages

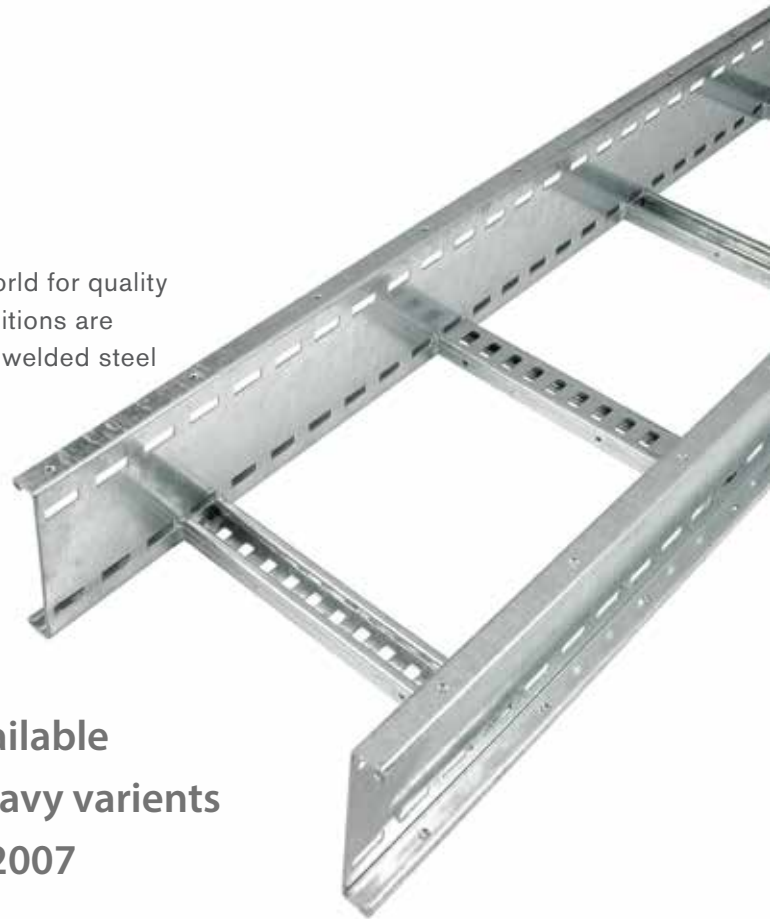

Versatile system for heavy cabling

Engineered to maximise long span runs

Standard finishes and special finishes available

Supplied in Medium, Heavy and Extra Heavy variants

CE Compliant to standard BS EN 61537 : 2007

Durable and Versatile

Cable ladders, Pre- Galvanised, Hot Dipped Galv or Stainless Steel, are selected because of their heavy load carrying capacities and the excellent performance they give in harsh environments where salt spray or salt laden atmosphere, and other mild corrosive materials are present. Applications such as Oil & Gas, Petrochemical, Energy, Industrial buildings etc

Cable Ladder - Medium, Heavy and Extra Heavy duties

Unistrut manufactures a complete range of cable ladder systems for a wide range of load and span combinations to suit the requirements of almost any installation. 100mm, 125mm or 150mm high cable ladder for light to heavy cable loads. Complete with wide range of accessories and fixings to suit.
